

Focus: Exploring capacity and consent when making shared decisions with CYP in health and social care

Questions

- 1) What factors affect CYP’s ability to make decisions?
- 2) What can we do to better support CYP capacity to make decisions? How do adults and services need to change to better support and encourage CYP ability and capacity?
- 3) How can we really know when they have the understanding to make different decisions? How can we challenge assumptions that CYP lack capacity?
